BAY AREA POPULATION

The Population Profile is one of a series of three publications presenting population, housing, and economic data by census tract for the entire Bay Area. The variables have been selected from the U.S. Census Fourth Count Population and Housing summary tapes. They were chosen for their value in identifying social characteristics of census tracts. The variables in this publication have been grouped into the following characteristics:

- 1) demographic, 2) racial and ethnic, 3) income, 4) educational, and 5) mobility.

The census tract number includes the identification in the last two digits of tracts that have been split from original single tracts. For unsplit tracts, the last two digits are zero. The definitions of the variables are listed below, excluding Racial and Ethnic Characteristics, which are self-explanatory.

Demographic Variables

TOTAL POP	Total Population
% POP <18	% Under 18
% POP <5	% Under 5
% POP >65	% 65 and Over
MEAN AGE	Mean Age of Population
AVG FMLY SZ	Average Family Size
PERSON/HH	Persons Per Household
% HH FEM HEAD	% Households with Female Head

Educational Characteristics

MEAN SCHL YR	Mean School Years Completed
% >25 W HS	% Over 25 with a High School Educ.

Mobility Characteristics

% MVD SNC '65	% Moved Since 1965
% MVD <'60	% Moved Before 1960

Income Characteristics

MEAN FM INC	Mean Family Income
% INC >\$15,000	% Population with Income Over \$15,000/year
% INC <\$5,000	% Population with Income Under \$5,000/year
INC <125% POOR	% Pop. with Income Under 125% of Poverty Level
NONWAGE/PCAP	Nonwage Income Per Recipient
